

# SUR ANALYSIS:

Institutional Psychotherapy and Analysis

Dates: 6<sup>th</sup> and 7<sup>th</sup> April

Institutional Analysis is the linchpin connecting Deleuze and Guattari's schizoanalysis and Frantz Fanon's contributions to post-colonial theory with art and aesthetics. However, strikingly little work has been done in this area.

This two-day event, the first of its kind in the UK, will bring together key figures in the Institutional Analysis movement as well as researchers working in this field in order to reconstruct the origins and development of this practice and introduce to the English speaking world this framework for engaging with philosophy, mental health, aesthetics and the arts.

Presentations from Jean-Claude Polack, Anne, Querrien, Howard Caygill, Andrew Goffey, Val Schaepelynck, Olivier Apprill, Susana Caló, David Reggio, and Anthony Faramelli. Incorporating a workshop for the application of Institutional Analysis in the context of higher education.
